

POOJA MANGALYA

DevOps & Cloud

Tamil Nadu, India | 8148023507 | poojamangalya1@gmail.com

PROFESSIONAL SUMMARY

Final-year MCA student with hands-on experience in AWS, Docker, Terraform, Jenkins, CI/CD, cloud networking, and monitoring. Built and practiced AWS infrastructure, 3-tier architectures, containerized applications, infrastructure automation, and monitoring solutions through academic projects and practical training.

TECHNICAL SKILLS

Cloud: AWS, EC2, VPC, S3, IAM, Application Load Balancer, Auto Scaling, RDS, CloudWatch, SNS

DevOps & CI/CD: Jenkins, CI/CD, Git, GitHub, Jenkinsfile

Containers: Docker, Docker Compose, Kubernetes (Basic)

Infrastructure as Code: Terraform

Monitoring: CloudWatch, Prometheus, Grafana, Alert manager, Node Exporter

Networking: TCP/IP, DNS, DHCP

Operating Systems: Linux

EXPERIENCE

DevOps Intern — Nayra Infolabs (OPC) Pvt. Ltd.

May 2026 – June 2026

- Contributed to DevOps and web application deployment activities in a cloud environment.
- Applied AWS infrastructure, application deployment, Docker, CI/CD, and infrastructure automation concepts during practical training.

PROJECTS

AWS 3-Tier Architecture

- Built a 3-tier application architecture on AWS with separated public and private subnets, using VPC, Application Load Balancer, Target Groups, EC2, Auto Scaling, NAT Gateway, and RDS.
- Implemented controlled communication between layers using Security Groups, including ALB, EC2, RDS access.
- Troubleshoot ALB target health, listeners, Security Groups, application ports, routing, and network connectivity while monitoring the AWS 3-tier architecture.

Jenkins CI/CD Pipeline

- Built a CI/CD pipeline using Jenkins to automate application build and deployment.
- Installed and configured Jenkins on an AWS EC2 instance and created a Jenkinsfile to define pipeline stages.

Dockerized Java Web Application

- Containerized a Java-based web application using Docker and a Dockerfile.
- Created a multi-container deployment using Docker Compose with MongoDB as the database container.

Terraform Infrastructure Automation

- Automated AWS infrastructure provisioning with Terraform and Infrastructure as Code (IaC), using Amazon S3 for Terraform state and DynamoDB for state locking.

EDUCATION

- **Master of Computer Applications (MCA)** — St. Joseph's College (Autonomous), Tamil Nadu | Final Year
- **B.Sc. Visual Communication** — Holy Cross College, Tamil Nadu
